

# Use Biobased Products to Cultivate Planet-Friendly Gardening Habits

We have over 400 biobased lawn maintenance and agriculture products across 20 categories in the BioPreferred® Program Catalog.

Look for USDA Certified Biobased Products whenever you feed your lawn and flowers, rid your garden of insects, pests and weeds, and protect your garden from water and soil run-off or erosion.

## Feed Your Lawn and Flowers

Two options from our Catalog:

- **Sustane Natural Fertilizer 4-6-4** is a slow-release granulated fertilizer derived from aerobically composted turkey litter, hydrolyzed feather meal and sulfate of potash.
- **Innate Bloom™** provides a macro and micronutrient source for plants and is derived from freshwater fish scraps sourced from the Great Lakes, with added kelp and fulvic acids.

## Rid Your Garden of Insects, Pests and Weeds

Pick from these and many others:

- **No More Bugs!** is made from cedar oil.
- **Just Scentsational Bare Ground Solutions Garlic Scentry** is made from >100% garlic liquid concentrate and is ready to spray on plants, fruits, vegetables, grass areas to repel small browsing animals, birds, mosquitoes, ticks, aphids, beetles and more.
- **Katoun® Gold** is a sunflower based, non-selective, broad spectrum, foliar-applied herbicide. It contains the active ingredient pelargonic acid which is a naturally occurring substance that is 100% biobased as it is derived from sunflower seeds.

## Protect Your Garden from Run-off and Erosion

We've seen explosive growth in this category. Here are just two choices to get the job done:

- **KoirLogs** are made from double cleaned, unsorted natural coconut fiber encased in a high tensile strength coir twine netting that can be used for streambank stabilization, shoreline protection, wetland mitigation, channel edge liner, wildlife habitats and landscaping.
- **NaturesOwn High Density Mulch** is made from clean, hand sorted, 100% recycled newspaper and is used for general turf seeding, erosion control, dust suppression, and reclamation projects.

The Number of Biobased Erosion Control Products in our Catalog Grew 111% in 1 Year!
